Referált folyóirat cikkek

1. *On the least prime in an arithmetic progression.* Studia Sci. Math. Hungar., **15** (1980), no. 1-3, 83–87.

2. *Irregularities in the distribution of prime ideals. I.* Studia Sci. Math. Hungar., **18** (1982), no. 1, 57–67.

3. *Irregularities in the distribution of prime ideals. II.* Studia Sci. Math. Hungar., **18** (1983), no. 2-4, 343–369.

4. *Note on a problem of Q. I. Rahman and P. Turán.* Acta Math. Hungar., **44** (1984), no. 3-4, 367–377.

5. *Effective oscillation theorems for a general class of real-valued remainder terms.* Acta Arith., **49** (1988), no. 5, 481–505.

6. (társszerző: M. Laczkovich), *Periodic decompositions of continuous functions.* Acta Math. Hungar., **54** (1989), no. 3-4, 329–341.

7. (társszerző: M. Laczkovich), *Decompositions into the sum of periodic functions belonging to a given Banach space.* Acta Math. Hungar., **55** (1990), no. 3-4, 353–363.

8. *On the convergence of Fourier series of U.A.P. functions.* J. Math. Anal. Appl., **151** (1990), no. 2, 308–317.

9. *Rearrangements of Fourier series.* J. Approx. Theory, **60** (1990), no. 1, 101–121.

10. *A Fejér type extremal problem.* Acta Math. Hungar., **57** (1991), no. 3-4, 279–283.

11. *On a class of extremal problems.* Approx. Theory Appl., **7** (1991), no. 3, 86–96.

12. (társszerző: I. Z. Ruzsa), *On approximating Lebesgue integrals by Riemann sums.* Glasgow Math. J., **33** (1991), no. 2, 129–134.

13. *Some trigonometric extremal problems and duality.* J. Austral. Math. Soc. Ser. A, **50** (1991), no. 3, 384–390.

14. *On Beurling's prime number theorem.* Period. Math. Hungar., **28** (1994), no. 3, 195–210.

15. *Rearrangement of Fourier series and Fourier series whose terms have random signs.* Acta Math. Hungar., **63** (1994), no. 4, 395–402.

16. *Fourier synthesis of bounded mean periodic functions by rearrangement of Fourier series.* J. Anal., **3** (1995), 179–188.

17. *The least possible value at zero of some nonnegative cosine polynomials and equivalent dual problems.* In: Proceedings of the Conference in Honor of Jean-Pierre Kahane (Orsay, 1993), number Special Issue, pages 485–508. 1995.

18. *Minimization of maxima of nonnegative and positive definite cosine polynomials with prescribed first coefficients.* Acta Sci. Math. (Szeged), **60** (1995), no. 3-4, 589–608.

19. (társszerző: A. Kroó), *On Bernstein and Markov-type inequalities for multivariate polynomials on convex bodies.* J. Approx. Theory, **99** (1999), no. 1, 134–152.

20. (társszerző: Y. Sarantopoulos), *Chebyshev's extremal problems of polynomial growth in real normed spaces.* Izv. Nats. Akad. Nauk Armenii Mat. (Contemp. Math. Anal., Armen. Acad. Sci), **36** (2001), no. 5, 62–81 (2002).

21. *Uniqueness of Markov-extremal polynomials on symmetric convex bodies.* Constr. Approx., **17** (2001), no. 3, 465–478.

22. *Uniqueness of multivariate Chebyshev-type extremal polynomials for convex bodies.* East J. Approx., **7** (2001), no. 2, 205–240.

23. (társszerző: M. N. Kolountzakis), *On a problem of Turán about positive definite functions.* Proc. Amer. Math. Soc., **131** (2003), no. 11, 3423–3430.

24. (társszerző: Y. Sarantopoulos), *On Markov constants of homogeneous polynomials over real normed spaces.* East J. Approx., **9** (2003), no. 3, 277–304.

25. (társszerző: Y. Sarantopoulos), *The generalized Minkowski functional with applications in approximation theory.* J. Convex Anal., **11** (2004), no. 2, 303–334.

26. (társszerző: A. Pappas), *Linear polarization constants of Hilbert spaces.* J. Math. Anal. Appl., **300** (2004), no. 1, 129–146.

27. *On generalized strong A-summability.* Sci. Math. Jpn., **60** (2004), no. 3, 595–611.

28. (társszerző: Y. Sarantopoulos), *Plank problems, polarization and Chebyshev constants.* J. Korean Math. Soc., **41** (2004), no. 1, 157–174. Satellite Conference on Infinite Dimensional Function Theory.

29. *Some polynomial inequalities on real normed spaces.* Publicaciones del Dpto. de Análisis del Matemático Sección 1, **63** (2004), 111–135.

30. (társszerző: L. B. Milev), *Bernstein's inequality for multivariate polynomials on the standard simplex.* J. Inequal. Appl., (2005), no. 2, 145–163.

31. (társszerző: B. Farkas), *Rendezvous numbers in normed spaces.* Bull. Austral. Math. Soc., **72** (2005), no. 3, 423–440.

32. *A comparative analysis of Bernstein type estimates for the derivative of multivariate polynomials.* Ann. Polon. Math., **88** (2006), no. 3, 229–245.

33. *Inequalities for multivariate polynomials.* Annals of the Marie Curie Fellowships, **4** (2006), 6 pages. (electronic); `http://www.mariecurie.org/annals/`.

34. *On a paper of Erőd and Turán-Markov inequalities for non-flat convex domains.* East J. Approx., **12** (2006), no. 4, 451–467.

35. (társszerző: M. N. Kolountzakis), *On pointwise estimates of positive definite functions with given support.* Canad. J. Math., **58** (2006), no. 2, 401–418.

36. (társszerző: V. A. Anagnostopoulos), *Polarization constants for products of linear functionals over $\mathbb{R}^2$ and $\mathbb{C}^2$ and Chebyshev constants of the unit sphere.* Publ. Math. Debrecen, **68** (2006), no. 1-2, 63–75.

37. (társszerző: B. Farkas), *Potential theoretic approach to rendezvous numbers.* Monatsh. Math., **148** (2006), no. 4, 309–331.

38. (társszerző: B. Farkas), *Rendezvous numbers of metric spaces—a potential theoretic approach.* Arch. Math. (Basel), **86** (2006), no. 3, 268–281.

39. (társszerző: B. Farkas), *Tiles with no spectra in dimension 4.* Math. Scand., **98** (2006), no. 1, 44–52.

40. *Turán type reverse Markov inequalities for compact convex sets.* J. Approx. Theory, **141** (2006), no. 2, 162–173.

41. (társszerző: M. N. Kolountzakis), *Turán's extremal problem for positive definite functions on groups.* J. London Math. Soc. (2), **74** (2006), no. 2, 475–496.

42. (társszerző: B. Farkas), *Decomposition as the sum of invariant functions with respect to commuting transformations.* Aequationes Math., **73** (2007), no. 3, 233–248.

43. *On some extremal problems of Landau.* Serdica Math. J., **33** (2007), no. 1, 125–162.

44. (társszerző: N. N. Reyes and G. A. M. Velasco), *Oscillation of Fourier transforms and Markov-Bernstein inequalities.* J. Approx. Theory, **145** (2007), no. 1, 100–110.

45. *Schur-type inequalities for complex polynomials with no zeros in the unit disk.* J. Inequal. Appl., (2007), Art. ID 90526, 10.

46. (társszerző: A. San Antolín), *Equilvalence of A-approximate continuity for self-adjoint expansive linear maps.* Linear Algebra Appl., **429** (2008), no. 7, 1504–1521.

47. (társszerző: A. Bonami), *Failure of Wiener's property for positive definite periodic functions.* C. R. Math. Acad. Sci. Paris, **346** (2008), no. 1-2, 39–44.

48. (társszerző: G. A. Munoz and J. B. Seoane), *Geometry of homogeneous polynomials on non symmetric convex bodies.* Math. Scand, **104** (2008), 1–14.

49. (társszerző: B. Farkas, V. Harangi and T. Keleti), *Invariant decomposition of functions with respect to commuting invertible transformations.* Proc. Amer. Math. Soc., **136** (2008), no. 4, 1325–1336.

50. (társszerző: B. Farkas), *Positive bases in spaces of polynomials.* Positivity, **12** (2008), no. 4, 691–709.

51. (társszerző: A. Bonami), *Integral concentration of idempotent trigonometric polynomials with gaps.* Amer. J. Math., **131** (2009), 1065–1108.

52. (társszerző: P. Jamming and M. Matolcsi), *On the extremal rays of the cone of positive, positive definite functions.* J. Fourier Anal. Appl., **15** (2009), no. 4, 561–582.

53. (társszerző: D. Burns, N. Levenberg and S. Ma'u), *Monge–Ampère measures for convex bodies and Berstein-Markov type inequalities.* Trans. Amer. Math. Soc., **362** (2010), no. 12, 6325–6340.

54. *Turán's extremal problem on locally compact Abelian groups.* Anal. Math., **37** (2011), no. 1, 15–50.

55. (társszerző: A. D. Roton), *Generalization of the effective Wiener-Ikehara theorem.* Int. J. Number Th., **9** (2013), no. 8, 2091–2128.

56. (társszerző: S. Krenedits), *Maximum of values attained at a given point by positive definite functions in locally compact Abelian groups.* J. Approx. Theory, **194** (2015), 108–131.

57. (társszerző: A. G. Babenko and M. V. Deikalova), *Weighted one-sided approximation of characteristic functions of intervals by polynomials on a closed interval (in Russian).* P. Steklov Inst. Math. (Supplementary Issues), **21** (2015), no. 4, 46–53.

58. *A discrete extension of the Blaschke Rolling Ball Theorem.* Geometriae Dedicata, **to appear** (2016), See on ArXiv as `arXiv:0903.4815`, 21 pages.
