

Publications of Phạm Ngọc Ánh

1. Die additive Struktur der im engeren Sinne linear kompakter Ringe, *Studia Sci. Math. Hungar.* **11** (1976), 205–210. **MR** 80k:16051
2. On semisimple classes of topological rings, *Annales Univ. Sci. Budapest. Sect. Math.* **20**(1977), 59–70. **MR** 57#3202
3. Über die Struktur linear kompakter Ringe, *Acta Math. Acad. Sci. Hungar.* **31**(1978), 61–73. **MR** 57#16361
4. Linearly compact semisimple rings and regular modules, *Math. Japonica* **23** (1979), 235 – 238 (with R. Wiegandt). **MR**: 80d:16026
5. Über die Struktur linear kompakter Ringe II, *Acta Math. Acad. Sci. Hungar.* **34**(1979), 245–251. **MR** 81h:16064
6. On the theory of linearly compact rings I, *Beiträge Alg. Geom.* **9** (1980), 13–27. **MR** 81f:16055
7. On a problem of F. Szász, *Commun. Algebra* **9** (1981), 1743–1746. **MR** 82m:16029
8. On Litoff's theorem, *Studia Sci. Math. Hungar.* **16** (1981), 255–259. **MR** 84k:16022
9. A note on linearly compact rings, *Acta Math. Acad. Sci. Hungar.* **39** (1982), 55–58. **MR** 83j:16051
10. On a problem of B. J. Müller, *Arch. Math.* **39** (1982), 303–305. **MR** 84a:16070
11. Duality over noetherian rings with Morita duality, *J. Algebra* **75** (1982), 275–285. **MR** 84f:16047
12. Duality of modules over topological rings, *J. Algebra* **75**(1982), 395–425. **MR** 84f:16048
13. On Rees matrix rings, *J. Algebra* **81** (1983), 340–369 (with L. Márki). **MR** 84k:16021
14. MHL-Ringe mit artinschem Radikal, *Studia Sci. Math. Hungar.* **18** (1983), 153–157. **MR** 86g:16019
15. Semisimple classes of nonassociative rings and Jordan algebras, *Commun. Algebra* **13** (1985), 2669 – 2690 (with R. Wiegandt). **MR** 87c:17008
16. A representation of locally artinian categories, *J. Pure Appl. Algebra* **36**(1985), 221–224. **MR** 87d:18007
17. To the radical theory of Andrunakievich varieties, *Bull. Austral. Math. Soc.* **31**(1985), 257 – 269 (with N. V. Loi and R. Wiegandt). **MR** 87e:17007
18. On Jordan locally matrix algebras, *Commun. Algebra* **14**(1986), 489–492. **MR** 87f:17020

19. On direct products of linearly compact primary rings, *Rend. Sem. Mat. Univ. Padova* **76** (1986), 45–58. **MR 88e:16022**
20. Morita equivalence for rings without identity, *Tsukuba J. Math.* **11** (1987), 1–16 (with L. Márki). **MR 88h:16054**
21. A representation of some Grothendieck categories, *Radovi Mat.* **3** (1987), 159–164. **MR 88k:18011**
22. Morita equivalence and tensor product rings, *Commun. Algebra* **17** (1989), 211–2137. **MR 91f:16015**
23. Morita duality for commutative rings, *Commun. Algebra* **18** (1990), 1781–1788. **MR91k:16011**
24. Left orders in regular rings with minimum condition for one-sided principal ideals, *Math. Proc. Cambridge Philos. Soc.* **109** (1991), 323–333 (with L. Márki). **MR 92i:16017**
25. Perfect rings without identity, *Commun. Algebra* **19** (1991), 1069–1082 (with N.V. Loi and D.V. Thanh). **MR 92k:16010**
26. Characterization of two-sided PF-rings, *J. Algebra* **141** (1991), 316–320. **MR 92i:16018**
27. A topological approach to Morita equivalence for rings with local units, *Rocky Mountain J. Math.* **22** (1992), 405–416 (with G.D. Abrams and L. Márki). **MR 93g:16007**
28. Left orders in strongly regular rings, *Proc. Royal Soc. Edinburgh Ser. A* **123** (1993), 303–310 (with L. Márki). **MR 94e:16029**
29. Rings with local units and descending chain condition, *Studia Sci. Math. Hungar.* **28** (1993), 285–288. **MR 95a:16032**
30. Morita duality for rings with local units, *J. Algebra* **164** (1994), 632–641 (with C. Menini). **MR 95d:16009**
31. An embedding theorem for abelian categories, *J. Algebra* **167** (1994), 627–633. **MR 95h:18010**
32. Morita duality for Grothendieck categories, *J. Algebra* **168** (1994), 273–293 (with R. Wiegandt). **MR 95h:18011**
33. A general theory of Fountain–Gould quotient rings, *Math. Slovaca* **44** (1994), 225–235 (with L. Márki). **MR 95f:16040**
34. Left orders in perfect rings with local units, *Acta Sci. Math. (Szeged)* **59** (1994), 3–15 (with L. Márki). **MR 95g:16015**
35. Morita duality, linear compactness and AB5*: a survey, in: *Abelian groups and modules* (Proc. Conf. Padova, 1994), eds. A. Facchini and C. Menini, Kluwer, 1995, 17–28. **MR 97f:16013**
36. Orders in primitive rings with non-zero socle and Posner’s theorem, *Commun. Algebra* **24** (1996), 289 – 294 (with L. Márki). **MR 96m:16025**
37. On Martindale’s theorem, *Rocky Mountain J. Math.* **29** (1996), 481–483 (with L. Márki).

38. Completely 0-simple semigroups of left quotients of a semigroup, *Internat. J. Algebra Comput.* **6** (1996), 143-153 (with V. Gould and L. Márki).
MR 97a:20095
39. Left orders in completely 0-simple semigroups, *Semigroup Forum* **53** (1996), 114-128 (with J. Fountain and L. Márki).
MR 97e:20089
40. Compactness in categories and interpretations, in: *Advances in Ring Theory* (Proc. Conf. Ohio State–Denison, 1996), edited by S. K. Jain and S. Tariq Rizvi, Birkhäuser, 1997, 17-30 (with R. Wiegandt).
MR 98m:18002
41. $AB5^*$ and linear compactness, *J. Algebra* **200** (1998), 99-117 (with D. Herbera and C. Menini).
MR 98m:16003
42. A note on selfdual modules and Dedekind rings, *J. Pure Appl. Algebra* **133** (1998), 23-25.
MR 99h:13025
43. $AB5^*$ for module and ring extensions, in: *Abelian groups, module theory, and topology*, Lect. Notes pure appl. math. **201**, Marcel Dekker, 1998, 59-68 (with D. Herbera and C. Menini).
MR 99k:16014
44. On Baer and Morita duality, *J. Algebra* **232** (2000), 462-484 (with D. Herbera and C. Menini).
45. Baer duality for commutative rings, *Forum Math.* **14** (2002), 47-63 (with D. Herbera and C. Menini).
MR 2002m:13013
46. Hall polynomials for \tilde{A}_n , *Arch. Math.* **78** (2002), 263 — 267.
MR 2003d:16020
47. Patching dualities, *J. Algebra & Appl.* **1**(3)(2002), 307-326 (with D. Herbera).
MR 2003g:16008
48. Some ultramatricial algebras which arise as intersections of Leavitt algebras *J. Algebra & Appl.* **1**(4)(2002), 357-363 (with G. Abrams).
MR2003m:16040
49. Immediate extensions and approximation of roots, *Forum Math.* **15** (2003), 201-227.
MR 2004e:13037
50. Moore-Penrose localisations, *J. Algebra & Appl.* **3** (1)(2004), 1–8 (with L.Márki).
51. Equivalent endomorphism rings arising from Morita contexts, *Comm. Algebra* **33**(2005), 97–100 (with M. Siddoway).
52. Selfdualities of serial rings, revisited, *Bull. London Math. Soc.* **38** (2006), 411 – 420.
53. Müller’s question on semiperfect complete HNP-rings, *Proc. Royal Soc. Edinburgh Ser. A* **49** (2006), 567 – 573 (with D. Herbera).
54. Isomorphisms between Leavitt algebras and their matrix rings, *J. reine angew. math.* **624** (2008), 103 – 132 (with G. Abrams and E. Pardo).
55. The classification question for Leavitt path algebras, *J. Algebra* **320**(5) (2008), 1983 –2026 (with G. Abrams, A. Louly and E. Pardo).
56. Divisibility theory of semi-hereditary rings, *Proc. AMS* **138** (2010), 4231 – 4242 (with M. Siddoway).

57. Automorphism groups of generalized triangular matrix rings, *Linear Algebra Appl.* **434** (2011), 1018 –1025 (with L. van Wyk).
58. Divisibility theory of commutative rings: Bezout monoids, *Trans. AMS* **364** (2012), 3967 –3992 (with L. Márki and P. Vámos).
59. Isomorphisms between strongly triangular matrix rings, *Linear Algebra Appl.* **438** (2013), 4374 – 4381 (with L. van Wyk).
60. Commutative orders revisited, *Semigroup Forum* **89** (2014), 336 – 366 (with V. Gould, P. A. Grillet and L. Márki).
61. Divisibility theory of arithmetical rings with one minimal prime ideal, *Comm. Algebra* **44**(2) (2016), 823 – 836 (with M. Siddoway).
62. A generalization of Clifford’s theorem, *Acta Mathematica Vietnamica* **41**(3) (2016), 471-480.
63. Gauss lemma and valuation theory, *Quaestiones Mathematicae* **39**(5)(2016), 603 –609 (with M. Siddoway).
64. Idempotents and structures of rings, *Linear & Multilinear Algebra* **64** (10)(2016), 2002 – 2029 (with G. F. Birkenmeier and L. van Wyk).
65. A new class of simple Noetherian V-rings, *J. Algebra* **493**(2018), 410 – 437 (with J. E. van den Berg).
66. Commutative rings whose principal ideals have unique generators, accepted (with K. Kearnes and A. Szendrei), in A. Facchini et al. (eds), *Advances in Rings, Modules and Factorizations*, Springer 2020, PMS 321, 1-9.
67. A matrix viewpoint for various algebraic extensions, *Elemente der Mathematik* **75** (2020), 1 – 17 (with G. Abrams).
68. Peirce decompositions, idempotents and rings, accepted *J. Algebra* **564**(2020), 247-275 (with G. F. Birkenmeier and L. van Wyk).
69. Special irreducible representations of Leavitt path algebras, *Adv. Math.* **377**(2021) 107483 (with T. G. Nam).
70. Skew polynomial rings: the schreier technique, *Acta Math. Vietnamica* <https://doi.org/10.1007/s402206-021-00466-7>
71. Module types of localizations, with applications to Leavitt path algebras, to appear in *Israel J. Mathematics* (with M. Siddoway).
72. Irreducible representations and prime factorizations in free algebras, manuscript (with F. Mantese).
73. Irreducible representations of Leavitt path algebras, manuscript.
