List of publications of Imre Bárány

14. Mental poker with three or more players, *Information and Control* 59 (1983), 84–93 (with Z. Füredi)

36. The Carathéodory number for the $k$–th core, *Combinatorica* 10 (1990), 185–195 (with M. Perles)

86. On 0-1 polytopes with many facets, *Advances in Math.*, 161 (2001), 209–228 (with A. Pór)

87. Equipartition of two measures by a 4-fan, *Discrete Comp. Geom.*, 27 (2002), 293–301, (with J. Matousek)

89. Approximation by random polytopes is of low complexity, Rendiconti di Palermo, 70 (2002), 53–56
94. The minimum area convex lattice $n$-gon, Combinatorica, 24 (2004), 171–185, (with N. Tokushige)
96. A case when the union of polytopes is convex, Lin. Alg. Appl., 397 (2005), 381–388, (with Komei Fukuda)
106. The probability that a convex body is lattice point free: a relative of Buffon’s needle problem, Random Structures and Alg. 30 (2007), 414–426

120. Infinite paths with no small angle, *Mathematika*, 56(2009), 35–44, (with A. Pór)

122. Every points is critical, submitted (2009), (with J-I. Ito, A. Vilcu, T. Zamfirescu)

125. Functions, measures, and equipartitioning convex k-fans, submitted 2010 (with P. Blagojević and A. Dmitrijević Blagojević)

129. Homogeneous selections from hyperplanes (with J. Pach) submitted to JCT B (2011)

130. On a question of V. I. Arnold, accepted in Acta Math Hung

131. Notes on the Carathéodory number (with Roman Karasev)
