1	Galois Theory of Fields	9
1.1	Algebraic Field Extensions	9
1.2	Galois Extensions	12
1.3	Infinite Galois Extensions	17
1.4	Interlude on Category Theory	24
1.5	Finite Étale Algebras	30
2	Fundamental Groups in Topology	37
2.1	Covers	37
2.2	Galois Covers	40
2.3	The Monodromy Action	44
2.4	The Universal Cover	48
2.5	Locally Constant Sheaves and Their Classification	54
2.6	Local Systems	60
2.7	The Riemann–Hilbert Correspondence	63
3	Riemann Surfaces	73
3.1	Basic Concepts	73
3.2	Local Structure of Holomorphic Maps	75
3.3	Relation with Field Theory	79
3.4	The Absolute Galois Group of $\mathbf{C}(t)$	85
3.5	An Alternate Approach: Patching Galois Covers	90
3.6	Topology of Riemann Surfaces	93
4	Fundamental Groups of Algebraic Curves	101
4.1	Background in Commutative Algebra	101
4.2	Curves over an Algebraically Closed Field	107
4.3	Affine Curves over a General Base Field	113
4.4	Proper Normal Curves	118
4.5	Finite Branched Covers of Normal Curves	121
4.6	The Algebraic Fundamental Group	126
4.7	The Outer Galois Action	130

4.8	Application to the Inverse Galois Problem	136
4.9	A Survey of Advanced Results	141
5	Fundamental Groups of Schemes	149
5.1	The Vocabulary of Schemes	149
5.2	Finite Étale Covers of Schemes	158
5.3	Galois Theory for Finite Étale Covers	165
5.4	The Algebraic Fundamental Group in the General Case	172
5.5	First Properties of the Fundamental Group	176
5.6	The Homotopy Exact Sequence and Applications	180
5.7	Structure Theorems for the Fundamental Group	187
5.8	The Abelianized Fundamental Group	197
6	Tannakian Fundamental Groups	211
6.1	Affine Group Schemes and Hopf Algebras	211
6.2	Categories of Comodules	218
6.3	Tensor Categories and the Tannaka–Krein Theorem	226
6.4	Second Interlude on Category Theory	232
6.5	Neutral Tannakian Categories	236
6.6	Differential Galois Groups	245
6.7	Nori’s Fundamental Group Scheme	251
	Bibliography	265
	Index	272
